Appl. No. 10/540,034 Amdt. dated April 30, 2008 Reply to Office action of December 10, 2007

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently amended) Drive arrangement of a wiper device for windows of motor vehicles with at least two swivel-mounted wiper arms (18, 20) that are connected to one another via a crank mechanism, wherein one of the wiper arms (18) is directly coupled with a driven shaft (16) of an electromotive drive (10), characterized in that the electromotive drive (10) includes a uniformly transmitting gear (14) coupled to a driving motor (12), and wherein the uniformly transmitting gear (14) includes the driven shaft (16), characterized in that an electric driving motor (12) of the drive (10) features rotational direction reversal, characterized in that a reversal of the rotational direction of the electromotive drive (10) is provided for at each end of travel of the wiper arms (18, 20), characterized in that the electromotive drive (10) features a sensory mechanism to detect the end of travel, characterized in that the electromotive drive (10) features a speed control, characterized in that the speed control always provides for a reduction in the rotational speed of the drive (10) near the ends of travel of the wiper arms (18, 20). characterized in that at least two wiper arms (18, 20) are coupled via a crank and rocker linkage (30), characterized in that both of the wiper arms (18, 20) feature a path of motion in the same direction, characterized in that at least two wiper arms (18, 20) feature an approximately parallel path of motion.

2-19. (Canceled)
